Professional Summary

Aspiring computer science engineer passionate about learning new technology and embedded systems. Seeking opportunities to apply new things and analytical skills in a dynamic engineering environment. Strong foundation to new things and automation with proven academic excellence.

Education

LENDI INSTITUTE OF ENGINEERING AND TECHNOLOGY 2028
B.Tech – Computer Science and Engineering

Year: 3rd Year | CGPA: 8.85
Expected Graduation: 2028

Technical Skills

Programming Languages	:	Python, Java, C
Web Technologies	:	HTML, CSS, JavaScript, Bootstrap
Databases	:	Data Structures, Database Management System, Advanced Data Structures
Tools	:	GitHub Copilot, ChatGPT, Visual Studio Code
Frameworks	:	Express.js, Spring Boot, Node.js

Projects

BuildGuardAI : An Intelligent System for Automated Building Boundary and Floor-Limit Violation Detection

Python | PyTorch | OpenCV | PostgreSQL
React.js | FastAPI | Leaflet | Rasterio

- **Description** : Government officials currently inspect buildings by visiting each area manually. This process takes a lot of time, requires many people, and some new or modified buildings may be missed.

  Solution: Our system automatically compares old and new satellite images using AI. If a new building is constructed or an existing building is modified, the system defects it and marks the location for verification.
- **Technologies Used** : Python, PyTorch / TensorFlow, OpenCV, PostgreSQL with PostGIS extension, Leaflet / OpenStreatMap, Rasterio / GeoPanda, FastAPI, React.js
- **Your Contribution** : Software Developer
- **GitHub Link** : https://github.com/Chakri3987

Achievements

- I GOT FREE SEAT TO STUDY INTERMEDIATE IN APRIC (I QUALIFIED THE WRITTEN EXAM)

Soft Skills

- Communication, teamwork, leadership, problem solving

Career Goal

- AI ENGINEER

Interests / Hobbies

- Reading Books, Playing Cricket, Exploring New Technologies.
